## Client Feedback

"Before the workshop with Celia, I was trying to do everything for all of my family, but felt lost and overwhelmed; I never did anything just for me. Since then, I have been able to strengthen relationships with my family, while giving myself permission to spend time on me; I have even been able to reduce my reliance on medication. This is just the start of my journey and I'm excited that I can now tune into my own intuition more clearly."
